

PRODUCT NEWS

STEINBERG UR28M

Connecting via USB 2.0, the DSP-powered Steinberg UR28M interface features digital and analog I/O with D-Pre mic preamps. The UR28M represents a top-notch recording system with plenty of inputs and outputs to connect to microphones, instruments, studio monitors and headphones. There's a USB connector to hook up to either your Mac or PC that lets you record and

mix your productions with the included Cubase AI workstation, or with your preferred audio software.

For more information on the Steinberg range of products, phone Yamaha Australia on (03) 9693 5111 or visit au.yamaha.com

URBANEARS, COLOUD AND MARSHALL

Fashion will meet functionality head-on with Amber Technology launching headphone ranges from Zound Industries, including products from Urbanears, Coloud and Marshall. The striking designs combine fashion and pristine audio quality, so you can look good while absorbing the best in sound technology. Snazzy!

For more information on Urbanears, Coloud and Marshall headphone ranges, phone Amber Technology on 1800 251 367 or visit www.ambertech.com.au

STEINBERG UR824

Delivering pristine sound quality, the UR824 audio interface perfectly combines high-speed USB 2.0 connectivity with balanced analog and digital inputs and outputs in various formats. The UR824's front panel hosts two Neutrik combo TRS/XLR connectors for balanced microphone/line input with switchable 48 volt phantom power and Hi-Z, pad push buttons for signal attenuation, gain controls with peak indicators. This

mixing and recording interface offers options to expand the number of analog inputs and outputs across the system via ADAT, providing up to 24 input and output channels.

AUDIO-TECHNICA LP120-USB TURNTABLE

Audio-Technica is introducing to Australia the LP120-USB Direct-Drive Turntable System - a professional-quality USB turntable and software package which enables those of us with vinyl to play their much loved discs and then easily download them into the digital domain. The system package includes the direct-drive turntable, Audio-Technica's excellent AT95E phono cartridge, PC and Mac compatible software, a USB cable and other accessories. The PC and Mac compatible Audacity software converts the audio on a record to MP3, WAV or other format digital audio files, which can then be played back on pretty much anything you want, really.

For more information on the Audio-Technica range of products, phone TAG on (02) 9519 0600 or visit www.tag.com.au

MOTU MIDI EXPRESS XT

The MIDI Express XT is MOTU's intelligent 128-channel USB MIDI interface for Mac and Windows. You get plug-and-play USB connectivity to any computer, sub-millisecond MIDI timing accuracy, eight separate MIDI inputs, nine MIDI outputs, sync features, a foot switch input, and tons of MIDI processing, including routing, merging, and muting.

For more information on the MOTU range of products, phone Major Music on 1300 30 66 70 or visit www.majormusic.com.au

SYDNEY SOUND CABLES

Providing handmade, work ready cables for Australia's professional personnel and performance artists, Sydney Sound Cables offers instrument and audio cables designed for your needs with prices that compare to mass produced alternatives. SSC assembles the finest cables from extensively tested parts and has hundreds of happy customers in Australia. SSC has a strong work ethic and understanding of reliability derived from years of experience in professional work. The handmade and tested products have a lifetime warranty. Consultation allows you to get what you need for your setup. Products including a range of guitar patch and pedal board, speaker cables, wireless belt pack cables and all pro audio cables, dmx and even high end hi-fi are available online. Cables made for audio professionals, for commercial and home studios, freelancers, students, camera operators and production facilities. The bulk pricing structure allows bands and people in business to get reliable cables affordably. Most orders are assembled and dispatched within 24 hours from Sydney.

For consultation and quotes email info@sydneycables.com.au or check out www.sydneycables.com.au

SAMSON HANDHELD - WIRELESS SYSTEM

Featuring a Q7 dynamic microphone capsule, the HT7 brings a high level of accuracy and audio performance to vocal miking applications thanks to its low mass, neodymium element. Using state-of-the-art microphone technology, the HT7 is engineered to the finest detail to provide the ultimate in sound reproduction and professionalism. Thanks to a high level of sensitivity, the HT7 will pick up all the nuances of any performance with exceptional clarity and detail. Plus, it employs a tight supercardioid pattern to reduce feedback and effectively reject signals not originating directly in front of the mic capsule. The CR77 true-diversity half-rack UHF receiver is at the core of the system. A synthesized PLL frequency control circuitry keeps the signal locked and true while dual tuned molded antennas with LEDs monitor the true-diversity operation.
